SCOPE OF WORKWork Desc : **Technological assistance in Batteries of CO&CCP**

Cond No	Cond Desc
0	<p>The operational works of battery are to be carried out in predominantly hot conditions. It is experienced that personnel deployed in predominantly hot condition works are paid more money by contractors in comparison with those deployed in normal condition works. Men to be deployed in hot condition works should have physical capability and wilful preparedness to withstand conditions of heat, follow the technological regime of working along with schedule for pushing/charging of oven etc., The contractor should provide suitable additional safety appliances to the labourers so as to enable them work in such an environment.</p> <p>Some jobs will be carried out in A/B/C shifts and some in general shift. The shift timings to the contract staff will be same as those of VSP shifts.</p> <p>In order to give a fair idea to the tenderer, the various works normally performed in battery operation are described below. The manpower indicated against each item is for carrying out the work in one battery in one shift.</p>
1	<p>S.No.1 of BOQ: Raking of sticker ovens</p> <p>Raking may be required for a part of the oven or full oven. Manpower has to be deployed in all three shifts. Raking has to be done intermittently so that oven temperature does not drop below permitted value.</p> <p>Raking may have to be started either from one side of the oven or from both sides of the oven at a time depending on the requirement. All raking tools and PPEs for labour deployed are to be supplied by the contractor. Minimum of 8 unskilled labour will have to be deployed for sticker oven per shift. They will alternately do the work. Deployment of labour for raking will have to be done at a very short notice.</p> <p>The job includes sole cleaning after pushing of sticker oven. During raking the coke thrown on pusher side/coke side platform should be quenched with water. The coke on the pusher side/coke side should be neatly stacked at the end benches. The coke thrown on loco track should be lifted and stacked properly on the other side of loco track.</p> <p>Many times ceramic wool blanket has to be fixed on one side or both sides of the oven for raking of coke. Fixing and removal of blanket form part of the job. VSP will provide ceramic blanket free of cost.</p>
2	<p>S.No.2 of BOQ: Gas track cleaning (usually in 'A/B/G' and in 'C' shift if battery condition so warrants)</p> <p>The job involves isolation of oven and cleaning manually of goose neck, stand pipe bore, stand pipe surface, AP cap and hatch. All deposits are to be removed by chiseling and gas track to be kept clean. The job to be taken up before the oven becomes ready for pushing and gas generation is very little. The oven is to be isolated by closing the valve box and</p>
