अध्यक्ष महोदय की कलम से ...

प्रिय सहकर्मियों,

आज इस्पात उद्योग बहुत ही चुनौतीपूर्ण दौर से गुजर रहा है। पूरे विश्व में, खासकर चीन के क्षमता विस्तारण में अत्यधिक वृद्धि और माँग में कमी के कारण दुनिया में इस्पात की माँग पर बहुत दबाव बना हुआ है। चीन के सकल घरेलू उत्पाद में गिरावट के कारण भारत की सामान्य अर्थव्यवस्था के साथ-साथ इस्पात उद्योग पर भी प्रभाव पड़ा है। सस्ते आयात एवं बाजार में मंदी जैसी प्रतिकूल परिस्थिति के बावजूद, वर्ष 2015 के दौरान भारत विश्व के कुछ देशों के साथ सकारात्मक वृद्धि दर्ज करते हुए विश्व के तीसरे सबसे बड़े इस्पात उत्पादक के रूप में उभरा है।

इस प्रकार, हम अपनी विकास यात्रा में 6.3 मिलियन टन प्रतिवर्ष विस्तारण कार्य की पूर्ति के पश्चात महत्वाकांक्षी आधुनिकीकरण हेतु पूरी गति के साथ आगे बढ़ रहे हैं, जिससे आगामी वर्षों में एक मिलियन टन और क्षमता का विस्तारण होगा। हमने वर्ष 2015-16 के लिए 30% से अधिक वृद्धि का एक बहुत ही चुनौतीपूर्ण लक्ष्य सामने रखा है।

हालाँकि, बाजार में मंदी के कारण हमें अपनी आर्थिक स्थिति को सुधारने हेतु अत्यधिक दबाव का सामना करना पड़ रहा है और हमें उत्पादन की मात्रा में सुधार, विस्तारण में अपनाई गई अद्यतन प्रौद्योगिकियों के अनुकूलतम उपयोग के माध्यम से उत्कृष्ट प्रौद्योगिकी-आर्थिक मापदंडों के अनुपालन, उच्च स्तर के रखरखाव व अनुरक्षण के साथ प्रचालन में सुधार, सभी कार्यों के निर्वह, कम से कम लागत, और इन सबसे ऊपर, सुरक्षा बोध के अनिवार्य मानकों के अनुपालन सहित क्रियाशील लागत संस्कृति को अपनाने की अत्यंत आवश्यकता है।

‘एक ही जगह पर अधिकतम क्षमता के साथ इस्पात का उत्पादन करनेवाला समुद्र तट पर अवस्थित देश का एकमात्र इस्पात संयंत्र’ के ध्येय के साथ परिकल्पित हमारी नई निगमित योजना - ध्येयपथ 2025, हमारी सफलता के घटकों एवं हमें प्राप्त अवसरों का परिचायक है। हमने प्रतिकूल परिस्थितियों में सदैव अपनी प्रतिबद्धता का परिचय देकर सफलता प्राप्त की है और ऐसा कोई कार्य नहीं है, जो हमारे लिए दुष्कर हो। मुझे पूरा विश्वास है कि हम टीम की भावना के साथ अपनी उच्च क्षमताओं का उपयोग करते हुए सभी कार्यों के उत्कृष्ट निष्पादन के माध्यम से अपनी लक्ष्य-प्राप्ति की ओर अग्रसर होंगे।

शुभकामनाओं सहित,

(पो मधुसूदन)

From CMD's Desk...

Dear Colleague,

The steel sector is in a very challenging phase today. The overhang of global excess capacity and poor steel outlook, particularly in China, is exerting an enormous pressure on the global steel demand. The decline in GDP growth in China has shifted the spotlight to India, not only for the general economy, but the steel industry as well. Despite adversities of cheap imports and sluggish market condition, India has been one of the few countries in the world that has registered a positive growth in 2015, which has helped the country to emerge as the 3rd largest steel producer in the world.

In this backdrop, we are at a defining moment in our growth journey, having completed our 6.3 mtpa expansion and the ambitious modernization drive in full swing that would add another million capacity in a couple of years. We have set a very challenging target for the year 2015-16 with a growth of over 30%.

However, there is enormous pressure on our bottom line due to subdued market conditions and there is a compelling need to make it healthy through improved volumes, best techno-economic parameters by optimally utilizing the latest technologies adopted in expansion, improved operations with high levels of housekeeping & maintenance, pro-active cost culture with a conscious drive to perform all tasks at least cost, and, above all, demonstration of formidable standards of safety consciousness in execution.

Our recently evolved Corporate Plan - Vision 2025, with an inspiring vision "to be the most efficient steel maker, having the largest single location shore-based steel plant in the country" identifies the factors that would be critical to our success and the options at hand. We have always risen to the occasion during tough times and no task is big for us. I truly believe that with our high levels of competencies blended with the spirit of team work, we can realize our vision with excellent performance in all spheres of our work.

All the Best !!

(P. Madhusudan)

SARALEEKARAN: Modification of Limit unit of Secondary Equalizing Valve in Bell-Less Top Charging System of BF-3.

The Bell-Less top charging system supplies and distributes raw-materials uniformly over the entire volume and periphery of the new Blast Furnace (BF-3).

The secondary equalizing valve in a Bell-Less top charging system is pneumatically operated valve with solenoid and limit feedbacks. Each bin is equipped with one valve and they are operated more than 550 times a day.

In the process of charging, secondary equalizing valve feedbacks were missing and this is leading to stoppage of charging sequence, which in turn leading to off-blast of the Furnace and thereby resulting in loss of Production.

Team from Blast Furnace department under the guidance of Sri. T.Satyanarayana, AGM (E), BF, identified that the improper coupling arrangement between drive shaft of actuator and spindle of limit unit is the root cause for missing feedback and also noticed that there was no rigid fixing between the two. Team also experienced failures in similar type of valves located in other areas like Slag Granulation Plant (INBA), Dust catcher, Stoves, Fire-fighting, Cast House Fume extraction system etc.

Team members, S/Sri MVN Prithviraj, SK Raja, M Srikanth, SM Vishnu Murthy, R Rama Rao, KVVMN Varma, GVSS Giridhar developed the solution by dismantling the existing limit unit and replacing it with a fixed stud (6 mm) and sensor arrangement. The existing threaded hole of the drive shaft groove was utilized for fixing the stud. The existing proximity switches were fixed to the base for open/close positions. The modification was carried out with in-house spares and within very less time. This implementation helped avoid the missing feedbacks of secondary equalizing valve. Similar implementation has now been standardized for 45 valves in other areas of the Blast Furnace # 3 like Stoves, Slag Granulation Plant, Dust catcher, Electro Static Precipitator, Fire-fighting. This significant modification has not only improved production and productivity, but has also enhanced safety and controlled the pollution.

Ukkuvani congratulates the entire team for its commendable work!
