Sri P K Rath, CMD, RINL and Sri M Harinarayan, IAS, Commissioner, GVMC jointly inaugurated the release of water into the new reservoir in the presence of Sri P Raychaudhury, Director (Commercial), Sri V V Venugopal Rao, Director (Finance), Sri R Nagarajan, ED (Projects I/C), RIN and union leaders. The new reservoir was built at a cost of about 465 Crores by M/S L&T Ltd. The new canal of 2.28 Km length was constructed to feed the water to the new reservoir. The facility is meant for meeting the additional requirement for the plant which was expanded and modernised taking the overall capacity to 7.3 million tonnes per annum. The regular pumping of water from the new reservoir will start from MAY-2019. Presently Visakha Industrial Water Supply Company (VIWCO) is supplying around 60 MGD water to the existing KBR-1 which is filled up completely. The expansion and modernization of Vizag Steel necessitated construction of another modern water storage facility to augment the water supply to the plant and township. Accordingly, KBR - 2 is constructed adjacent to the National Highway (Kurmannaapalem) at an estimated cost of Rs 465 crores. The storage capacity of KBR - 2 will be 12.32 million cubic metres and the reservoir will have 24 meters depth of single compartment with emphasis on green cover around it. Once it is fully completed, the reservoir will give a new look and will be a onlookers paradise to the tourists visiting Ukkunagaram.
