These equipments operate at high speeds at variable loads. These equipment are provided with prime metals vibration data collection unit (DCU) with location marking on equipment for recording equipment vibrations. 2) WRM 2 shall download the vibration measurement file from the DCU equipment on USB stick and send this collected data along with all the necessary rolling and equipment motor speed data by e-mail to primetals of india electronically by internet/e-mail which in-turn will take up with primetals USA. The agency will issue the expert expert vibration signature analysis report articulating experts findings, equipment health evaluation & diagnosis/recommendations. 3) M/s premetals being OEM designer and the original manufacturer of these equipments will have the advantage of the engineering and design know how to these services. 4) VSP does not have expertise, necessary equipment and software to carry out this vibration signature analysis.
