Electrical test where carried out on the rotor. The insulation resistance value of the Rotor is Zero impedance test result was abnormal. The damaged rotor is replaced with the spare rotor and there is no spare rotor available 2) Inspection, assessing the damage and repair of TG Generator rotor is a specialized job and requires expertise sophisticated machinery special tools and tackles which are tailor made for rotor repair. The rotor is to be inspected jointly by VSP and BHEL at BHEL, Hyderabad for assessing the repair and freeze scope of work 3) M/s.BHEL is the OEM of this 60MW generator rotor having the required knowhow, relevant drawings, special Jigs and Fixtures and the required facilities for rotor dynamic balancing in "Vacuum Tunnel" are available at BHEL Hyderabad 4) VSP does not have in-House facility and expertise for carrying out these specialized jobs |

CNC grinding machine type WGM 20 for guide rollers, 1 no. Wheel dressing machine type WDM 25 and 1 no. wheel dressing machine type WDM 15N are envisaged for the grinding of rings and dressing of high speed mill guide rollers and all the machines are in continuous operation. 2) These machines are very critical in terms of maintaining the dimensional tolerances and quality of finished wire rods produced. Regular maintenance of these machines is being done by VSP employees. However the expertise for trouble shooting in case of major break downs, checking the machine control systems consisting of Drives, PLC and related hardware-software systems and run outs/accuracy are not available with VSP. 3) The OEM has engineering, design knowhow, expertise to identify spares requirement and its replacement. OEM has authorised M/s Wendt India Limited as their sales and service provider. |
