## LIST OF ANNEXURES

| Annexure. No. | Description            | Pg.No |
|---------------|------------------------|-------|
| Annexure – 1  | Ambient Air Quality    | 27    |
| Annexure – 2  | Dustfall measurement   | 31    |
| Annexure – 3  | Noise Level Monitoring | 35    |
| Annexure – 4  | Water Quality          | 37    |

# CHAPTER - 1 INTRODUCTION

#### 1.0 INTRODUCTION

Rashtriya Ispat Nigam Limited, the corporate entity of Visakhapatnam Steel Plant is a Navratna PSE under the Ministry of Steel. Visakhapatnam Steel Plant fondly called Vizag steel. It is the first shore based Integrated Steel Plant in the country and is known for its quality products delighting the customers. It is a market leader in long products and it caters to the needs of diverse industrial sectors. It is the first Steel plant to be certified ISO 9001:2008 (presently 2015), ISO 14001:2004 (presently 2015), OHSAS 18001:2007 and ISO/IEC 27001:2013 Standards. It is also the first PSE to be certified ISO 50001:2011 – Energy Management Systems and has acquired CMMI Level 3 Certification for S/W development.

The Infrastructure of Visakhapatnam Steel Plant comprises of Coke Ovens and Coal Chemical Plant, Sinter Plant, Blast furnace, Calcining and Refractory Material Plant, Steel Melt Shop and Continuous Casting, Light and Medium Merchant Mill, Medium Merchant and Structural Mill, Wire rod mill, Steel melt shop, Thermal power plant.

Rashtriya Ispat Nigam Limited, has captive mines namely Jaggayyapeta Limestone Mine, Madharam Dolomite Mine, Garbham Manganese Mine, Saripalli Sand Mine and Kintada Quartz Mine.

RINL has retained M/s. SV ENVIRO LABS & CONSULTANTS, to carry out the environmental monitoring studies at Saripalli Sand Mine.

This report presents the environmental monitoring data of Post Monsoon Season – November '2020 at Saripalli Sand Mine.

#### 1.1 LOCATION OF THE PROJECT

The Project site is located at Saripalli Sand Mine of M/s. Rashtriya Ispat Nigam Limited located at Saripalli Village, Nellimarla Mandal, Vizianagaram District, Andhra Pradesh.

## CHAPTER - 2 SCOPE OF WORK

## 2.0 SCOPE OF WORK

The scope of the studies include monitoring of the following environmental components

- 1. Meteorological data
- 2. Ambient Air Quality
- 3. Dustfall Rate
- 4. Noise Level monitoring at Work zones
- 5. Water quality

The parameters covered under the scope for each of the above attributes are given below:

## **SCOPE OF WORK**

| S.No | Attribute           | Scope   |  |  |  |
|------|---------------------|---|--|--|--|
| 1.   | Meteorological Data | Collection of micrometeorological data at project |  |  |  |
|      |                     | site for 15 days in a season by installing an     |  |  |  |
|      |                     | weather monitoring station at plant site covering |  |  |  |
|      |                     | the following parameters :                        |  |  |  |
|      |                     | Temperature                                       |  |  |  |
|      |                     | Relative humidity                                 |  |  |  |
|      |                     | Wind speed  |  |  |  |
|      |                     | Wind direction                                    |  |  |  |
|      |                     | Rainfall  |  |  |  |
|      |                     | Frequency: Micro-meteorological data for          |  |  |  |
|      |                     | 15days continuously in a season for three seasons |  |  |  |
|      |                     | i.e. Post Monsoon, Winter and Summer seasons.     |  |  |  |
|      |                     | Yearly rainfall data to be collected.             |  |  |  |
| 2.   | Ambient Air Quality | Sampling of ambient air at 03 stations for        |  |  |  |
|      |                     | analyzing the following parameters:               |  |  |  |
|      |                     | • SPM   |  |  |  |
|      |                     | • PM10  |  |  |  |

|    |                      | • PM2.5   |  |  |  |
|----|----------------------|---|--|--|--|
|    |                      | • SO2   |  |  |  |
|    |                      | • NOx   |  |  |  |
|    |                      | • CO  |  |  |  |
|    |                      | Frequency: At each station samples will be            |  |  |  |
|    |                      | collected on 8 hourly basis for 24hrs duration,       |  |  |  |
|    |                      | 2days per week for two weeks alternatively in a       |  |  |  |
|    |                      | month for three seasons i.e. Post Monsoon, Winter     |  |  |  |
|    |                      | and Summer seasons                                    |  |  |  |
| 3. | <b>Dustfall Rate</b> | Collection of dustfall at 3 locations for 15days      |  |  |  |
|    |                      | continuously in a month.                              |  |  |  |
|    |                      | • Dustfall  |  |  |  |
|    |                      | Frequency: 30 days continuously for a month for       |  |  |  |
|    |                      | three seasons i.e. Post Monsoon, Winter and           |  |  |  |
|    |                      | Summer seasons  |  |  |  |
| 4. | Noise Levels         | Monitoring of noise levels at four locations at       |  |  |  |
|    |                      | work zones.   |  |  |  |
|    |                      | Frequency: Readings recorded on 8 hourly basis        |  |  |  |
|    |                      | at one hour interval at all locations in a month of a |  |  |  |
|    |                      | season for three seasons i.e. Post Monsoon, Winter    |  |  |  |
|    |                      | and Summer seasons.                                   |  |  |  |
| 5. | Water quality        | Collection and analysis of Surface water and well     |  |  |  |
|    |                      | water as per  |  |  |  |
|    |                      | • IS 10500 (Drinking water specifications)            |  |  |  |
|    |                      | • GSR 422 (E) –Inland surface water                   |  |  |  |
|    |                      | Frequency: Once in a season for all the four          |  |  |  |
|    |                      | seasons at all locations                              |  |  |  |

## CHAPTER - 3 <u>METHODOLOGY</u>

## 3.0 METHODOLOGY

Methodologies adopted for sampling and analysis for each of the above parameters are detailed below

Methods of monitoring and analysis for various parameters

| S.No | Attributes  | Measurement Technique                      |   |                             |  |
|------|---|--|---|-----------------------------|--|
| 1.   | Meteorological parameters   | WEATHER STATION                            |   |                             |  |
|      | Ambient Air Quality   | SPM  | Respirable Dust Sampler (Gravimetric method)  | IS-5182<br>(Part-IV)        |  |
|      |   | PM <sub>10</sub>                           | Respirable Dust Sampler (Gravimetric method)  | IS-5182<br>(Part-<br>XXIII) |  |
| 2.   |   | PM <sub>2.5</sub>                          | Fine Particulate Sampler (Gravimetric method) | IS-5182<br>(Part-<br>XXIV)  |  |
|      |   | Sulphur dioxide                            | Modified West<br>and Gaeke                    | IS-5182<br>(Port II)        |  |
|      |   | Oxides<br>of<br>Nitrogen                   | Jacob &<br>Hochheiser                         | (Part-II) IS-5182 (Part-VI) |  |
|      |   | СО   | Grab sample                                   | IS-5182<br>(Part – X)       |  |
| 3.   | Dustfall Rate   | IS-5182 (Part – 1)<br>(Gravimetric method) |   |                             |  |
| 4.   | Noise Monitoring  | Pre calibrated Sound Level Meter           |   |                             |  |
| 5.   | Water Quality (Surface water, Mine discharge water, Well Water and Treated water) | As per APHA 23 <sup>rd</sup> Edition'2017  |   |                             |  |

## **CHAPTER - 4**

## **ENVIRONMENTAL MONITORING STUDIES**

11

|    |               |                             |                                |
|    |               |                             |                                |

### 4.1.1 METEOROLOGICAL DATA

Meteorological data was collected on hourly basis by installing a weather monitoring station at Plant site. The report depicted hereunder represents the data for 16<sup>th</sup> November to 30<sup>th</sup> November '2020.

The following parameters were recorded

- Wind speed
- Wind direction
- Temperature
- Relative humidity
- Rainfall

## MINIMUM AND MAXIMUM VALUES OF RELATIVE HUMIDITY, TEMPERATURE AND RAINFALL DURING STUDY PERIOD

|         | Temperature in °C | Relative Humidity | Rainfall in mm |
|---------|-------------------|-------------------|----------------|
| Minimum | 13                | 40                | 0.1            |
| Maximum | 32                | 95                | 7.6            |
| Mean    | 24.7              | 67                | -              |
| Total   | -                 | -                 | 46.6           |

Fig -1. Graphical interpretation of Minimum and Maximum values of Temperature during study period.

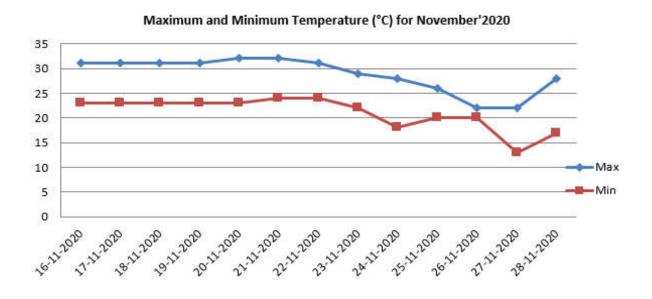

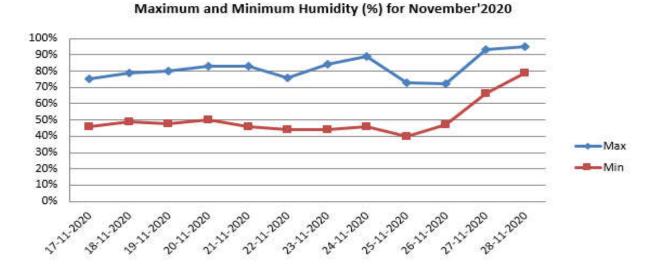

Fig-2 .Graphical interpretation of Minimum and Maximum values of Relative Humidity during study period.

## WIND PATTERN – November' 2020

## 4.2 AMBIENT AIR QUALITY MONITORING

The ambient air quality was assessed through a network of 03 AAQM stations.

The locations of ambient air quality stations are given below:

| Station code | Location          | <b>Environmental setting</b> |
|--------------|-------------------|------------------------------|
| A1           | Mining Area       | Industrial                   |
| A2           | Kudipi Village    | Residential                  |
| A3           | Saripalli Village | Residential                  |

## Monitoring reports are enclosed as Annexure - I

## 4.3 DUST FALL MEASUREMENT

Dust fall monitoring was conducted at 03 stations. Details of locations mentioned hereunder:

| Station code | Location          | Environmental setting |
|--------------|-------------------|-----------------------|
| DF1          | Mining Area       | Industrial            |
| DF2          | Kudipi Village    | Industrial            |
| DF3          | Saripalli Village | Industrial            |

Monitoring reports are enclosed as Annexure – II

## 4.4 NOISE LEVEL MONITORING

Noise levels were monitoring at four locations mentioned hereunder:

| Station code | Location          | Environmental setting |
|--------------|-------------------|-----------------------|
| N1           | Mining Area       | Industrial            |
| N2           | Kudipi Village    | Residential           |
| N3           | Loading Point     | Industrial            |
| N4           | Saripalli Village | Industrial            |

Monitoring reports are enclosed as Annexure - III

## 4.5 WATER QUALITY

Water samples were collected at the following points.

| Station code | Location                     | Environmental setting |
|--------------|------------------------------|-----------------------|
| W1           | Champavathi River Upstream   | Surface water         |
| W2           | Champavathi Downstream       | Surface water         |
| W3           | Kudipi Village Well Water    | Ground water          |
| W4           | Sarepalli Village Well Water | Ground water          |

The methodology for sample collection and preservation techniques was followed as per the Standard Operating Procedures (SOP) mentioned in table hereunder:

Standard Operating Procedures (SOP) For Water Sampling

| Parameter                                      | Sample Collection                              | Sample<br>Size | Storage/ Preservation  |
|--|--|----------------|--|
| pH   | Grab sampling Plastic /glass container         | 50 ml          | Refrigeration, can be stored for 7 days                            |
| Electrical<br>Conductivity                     | Grab sampling Plastic /glass container         | 50 ml          | Refrigeration, can be stored for 7 days                            |
| Total suspended solids                         | Grab sampling Plastic /glass container         | 100 ml         | Refrigeration,<br>can be stored for 7 days                         |
| Total Dissolved Solids                         | Grab sampling Plastic /glass container         | 100 ml         | Refrigeration, can be stored for 7 days                            |
| BOD  | Grab sampling Plastic /glass container         | 500 ml         | Refrigeration, 48 hrs  |
| Hardness                                       | Grab sampling Plastic /glass container         | 100 ml         | Add HNO <sub>3</sub> to pH<2, refrigeration; 6 months              |
| Chlorides                                      | Grab sampling Plastic /glass container         | 50 ml          | Not required; 28 days  |
| Sulphates                                      | Grab sampling Plastic /glass container         | 100 ml         | Refrigeration; 28 days   |
| Nitrates                                       | Plastic containers                             | 100 ml         | Refrigeration; 48 hrs  |
| Fluorides                                      | Plastic containers only                        | 100 ml         | Not required; 28 days  |
| Alkalinity                                     | Plastic/ glass containers                      | 100 ml         | Refrigeration; 14 days   |
| Ammonia  | Plastic/ glass containers                      | 100 ml         | Add H <sub>2</sub> SO <sub>4</sub> to pH>2, refrigeration, 28 days |
| Heavy Metals (Ar, Cd, Mn, Cu, Fe, Zn, Pb etc.) | Plastic/ Glass rinse with 1+1 HNO <sub>3</sub> | 500 ml         | Filter, add HNO <sub>3</sub> to pH>2; Grab sample; 6 months        |
